Tips for Successful Online Learning

- Review your syllabus, list assignments in your calendar or planner, and set reminders; be proactive and reach out to your professors with any questions.
- Try time blocking or another time management technique to balance your class assignments with your other responsibilities.
- Confirm that you have all the resources you need for online learning, such as a working computer, webcam, access to the internet, and required software programs.
- Review your school's online learning platform, practice video chats, download materials, or other computer activities so that you are prepared for your online class.
